Dear Josh:

I was sorry to hear about your respiratory problems and really regret your not being able to come down for our meeting. It was a very good one and all in all quite useful, much more so than those formal affairs.

The micromanipulator has been packed up and should be sent off to you by tomorrow. I will need it back in about 4 months. Please let me know by official letter as soon as it arrives. I have made all other formal arrangements necessary for its loan. I hope this will be useful in speeding up your work.

With kindest regards to yourself and Esther.

Sincerely yours,

S. Spiegelman  
Professor of Bacteriology
